Countries in yellow are endemic. Countries in pale yellow are considered to have active transmission (i.e. within the previous 6 months) of an imported poliovirus

¹Data in WHO HQ on 24 Jul 2012 for 2012 data and 23 Jul 2013 for 2013 data. ²Wild viruses from environmental samples, contacts and other non-AFP sources. ³All cases, except those occurring in endemic countries, are importation related. ⁴The 2010 total includes cases with inadequate specimens that were exceptionally classified as confirmed polio based on their association with the WPV1 outbreak. ⁵As of 28 February 2012, India is no longer considered to be a polio-endemic country. ⁶Includes 1 case in 2012, 3 in 2009 and 2 in 2008 with a mixture of W1W3 virus. NA - Most recent case had onset prior to 1999.
