No. of countries (infected)	5	8	9	2	3	2	2									
No. of countries (endemic)	3	3	3	3 ⁶	3 ⁶	3 ⁶	3									

Countries in yellow are endemic. ¹Data in WHO HQ on 18 April 2017 for 2017 data and 19 April 2016 for 2016 data.

²Wild viruses from environmental samples, contacts & other sources. ³In March 2014, a serotype 1 wild poliovirus was detected in an environment specimen from Brazil, further investigation indicates this is an isolated event without evidence of circulation. ⁴Results are based on L20B positive culture. Prior to reporting week 16, 2014, results were based on a combination of direct qRT-PCR on RNA from concentrated sewage and L20B positive culture. ⁵Includes 1 case in 2012 with a mixture of W1W3 virus.

⁶Between 27 Sep 2015 and 27 Sep 2016, Nigeria was not classified as endemic. NA - Most recent case had onset prior to 1999.
