

# POLIO NEWS

Dear polio eradication supporter,  
 The year's end offers the chance to reflect on the polio programme's progress and look ahead to the challenges that we still need to overcome to reach every child. While the past year has brought more progress, the continued commitment of health workers, country governments, donors and partners—combined with innovative strategies to deliver vaccines to children in every corner of the globe—will be essential to ending polio once and for all.

## Working toward a Polio-Free Future: 2017 in Review

2017 brought new political and financial commitments, as well as important programmatic advances, that will be crucial to ending polio. If the programme continues to overcome obstacles and maintain high levels of commitment from countries, donors and partners, the world will have its best chance yet to rapidly end the disease once and for all. ## Responding to Challenges in Syria

In Syria, where ongoing conflict has severely disrupted the delivery of health services, polio workers are responding to an outbreak of vaccine-derived polio. Ongoing vaccination campaigns have reached hundreds of thousands of children since the outbreak began in June, and complementary strategies, such as vaccination at transit points, are helping to pinpoint and protect the most vulnerable children. These efforts demonstrate how the polio programme strives to effectively reach children in conflict and insecure zones. [\[Read more\]](#)

## Striving to Reach All Children, Everywhere

For many people living in urban environments, accessing health services can be hard due to lack of infrastructure and attention from health authorities. In Pakistan, polio workers and routine immunization teams exchange information to identify and vaccinate children living in these dense urban areas. This is just one example of how the polio programme works with other initiatives to deliver essential health services to all children.
