<b>Tot. in non-end countries</b>	256	19	0	0	0	0	0									
<b>No. of countries (infected)</b>	8	9	2	3	3	2	1									
<b>No. of countries (endemic)</b>	3	3	3 <sup>5</sup>	3 <sup>5</sup>	3 <sup>5</sup>	3	3									

Countries in yellow are endemic. <sup>1</sup>Data in WHO HQ on 28 Mar 2017 for 2017 data and 27 Mar for 2018 data.

<sup>2</sup>Wild viruses from environmental samples, selected contacts, healthy children and other sources. <sup>3</sup>In March 2014, a serotype 1 wild poliovirus was detected in an environment specimen from Brazil, further investigation indicates this is an isolated event without evidence of circulation. <sup>4</sup>Results are based on L20B positive culture. Prior to reporting week 16, 2014, results were based on a combination of direct qRT-PCR on RNA from concentrated sewage and L20B positive culture. <sup>5</sup>Between 27 Sep 2015 and 27 Sep 2016, Nigeria was not classified as endemic. NA - Most recent case had onset prior to 1999. <sup>6</sup>Exceptionally reporting case-contact of a positive index case given the date of collection is later than the onset date of the most recent WPV.
