**Countries in yellow are endemic.**

*Wild viruses from environmental samples, selected contacts, healthy children and other sources. Last WPV type 3 had its onset on 10 November 2012.*

*Between 27 Sep 2015 and 27 Sep 2016, Nigeria was not classified as endemic, and declared Wild polio-free as of June 2020.*

*Exceptionally reporting case-contact of a positive index case given the date of collection is later than the onset date of the most recent WPV.*

Data in WHO HQ as of 27 Jul. 2021
