	Regional Total	3	3	2		2	
WHO Western Pacific Region	Australia	1					1
	China	7	7	Unknown		7	
	Indonesia	1					1
	Japan	3			3	2	1
	Republic of Korea	1					1
	Regional Total	13	7	7	3	9	4
Global		70	50		12	40	10

*The Poliovirus Containment Certification Scheme (CCS) includes three stages of containment certification: (1) Certificate of Participation (CP); (2) Interim Certificate of Containment (ICC); and (3) Certificate of Containment (CC). Facilities may only hold one containment certificate type at a time.

[†]Facilities are designated by ministries of health or another national authority as serving critical functions requiring the retention of needed polioviruses. The number of facilities designated (A) are facilities currently with or without as in the case of expiry or never been awarded any valid poliovirus containment certificate type (B + D + F). These numbers do not reflect facilities that have withdrawn from the CCS following the cessation of work with poliovirus or otherwise.

[‡]'Without' refers to facilities not having ever achieved a CP or whose CP has reached its end-validity.

[§]'Expired' refers to facilities whose ICC has reached its end-validity.

[¶]Country has yet to establish a National Authority for Containment. **Information not yet available at WHO
